

SPIS TREŚCI

Zbigniew Świtalski – Stability and Price Equilibria in a Many-to-Many Gale-Shapley Market Model	229
Agnieszka Lipieta – Adjustment Processes on the Market with Countable Number of Agents and Commodities.	249
Maciej Nowak, Tadeusz Trzaskalik – Quasi-Hierarchical Approach to Discrete Multiobjective Stochastic Dynamic Programming	265
Lech Kruś, Irena Woroniecka-Leciejewicz – Monetary-Fiscal Game Analyzed Using a Macroeconomic Model for Poland.	285
Jan Purczyński, Kamila Bednarz-Okrzyńska – The Raybit Model and the Assessment of its Quality in Comparison with the Logit and Probit Models.	305
Alicja Olejnik, Jakub Olejnik – An Alternative to Partial Regression in Maximum Likelihood Estimation of Spatial Autoregressive Panel Data Model	323
Witold Rzymowski, Agnieszka Surowiec – Modelling Population Growth with Difference Equation Method.	339
